

Asaf Dayan

☎ 052-648-2121 🏠 Tel Aviv ✉ asaf.dayan13@gmail.com

System engineer with hands-on experience developing UAV payloads, RF and communication architectures, and field-deployed mission-critical technologies. Takes ownership of early-stage concepts and drives them from initial idea through design, integration, validation, and deployment.

🧰 Experience

Israeli Military Intelligence - Unit 8200

2025 – Present

RF Systems Engineer | Innovation Lab

- Designed and validated RF TRX chains in airborne environments, addressing constraints such as size, power, reliability, and signal conditions.
- Conducting deep technical research and evaluation of RF architectures for mission-critical applications, with focus on practical validation under real-world operational constraints.

Israeli Military Intelligence - Unit 8200

Oct 2023 – 2024

System Engineer (Reserve Service)

- Led the end-to-end development of a UAV-based cyber payload, from initial concept through system design and field deployment.
- Evaluated and adapted commercial UAV platforms to meet specific operational needs.

Israeli Military Intelligence - Unit 8200

2022 – 2023

R&D | Tactical Cyber Systems (Military Service)

- Took part in the development of tactical cyber systems, from early requirements through validation and field use.
- Worked on cross-domain systems combining software, RF, and embedded components in constrained airborne environments.

Service at Prime Minister Office

2020 – 2022

Technical Product Manager (Military Service)

- Worked on VISINT surveillance systems involving electro-optical sensors, laser-based technologies, and real-time video transmission.
- Evaluated commercial and in-house technologies for operational use, translating field needs into system requirements and deployment concepts.
- Defined practical system constraints, including sensor performance, communication reliability, deployment workflow, and usability.

🎓 Education

Tel Aviv University

2023 – 2027

B.Sc. in Electrical Engineering, Mandel Program for Humanities in Engineering

- Selective honors track combining engineering with philosophy, ethics, and the history of science.

🌐 Volunteering

Team Lead @ 8200 Ecothon (Climate Hackathon)

- Led development of a QGIS plugin for assessing street walkability and helping municipalities prioritize tree planting.
- Won 2nd place out of 15 teams.

First Aid Attendant at Magen David Adom

- Volunteered as a first aid attendant; completed ICU training in 2018.

🏆 Awards and Certificates

Unit 8200 Special Award

Apr 2024

WSET Level 2 Awards in Wines

Aug 2023
